COFFEE SHOP SALES: INSIGHTS REPORT

Jan-Jun 2023 | Deep dive: May 2023

1. Overview

The dataset covers 149,116 transactions from three stores (Astoria, Hell's Kitchen and Lower Manhattan) between 1 January and 30 June 2023. In total the stores sold **$698.8K** worth of products, **214,470** units across 9 product categories. Here, an "order" means one transaction row in the data.

Month	Sales	Orders	Quantity	Sales MoM
Jan	$81,678	17,314	24,870	-
Feb	$76,145	16,359	23,550	-6.8%
Mar	$98,835	21,229	30,406	+29.8%
Apr	$118,941	25,335	36,469	+20.3%
May	$156,728	33,527	48,233	+31.8%
Jun	$166,486	35,352	50,942	+6.2%

2. Growth

- **Sales doubled in six months.** Monthly sales went from $81,678 in January to $166,486 in June, an increase of 103.8%. February was the only month that dropped (-6.8%).
- **May was the strongest jump.** Sales reached $156,728 (+31.77% vs April), orders reached 33,527 (+32.33%) and units sold reached 48,233 (+32.26%).
- **Growth came from volume, not price.** The average sale stayed at about $4.69 in every month (between $4.65 and $4.72), so more customers and more items drove the increase.

3. When customers buy (May 2023)

- **Mornings drive the business.** The three hours from 8:00 to 10:59 am bring in $57,607, which is 36.8% of May sales. Including the 7 am hour, 7:00 to 10:59 am makes up 45.9%. The single biggest hour is 10 am ($19,639).
- **Afternoons are much quieter.** Hours 11 am to 5 pm average $9,324 per hour, about half of a morning peak hour. The 8 pm hour brings only $656 (0.4% of sales).
- **Weekends sell as well as weekdays, day for day.** Weekdays made $116,628 (74.4%) and weekends $40,100 (25.6%), but May 2023 had 23 weekdays and only 8 weekend days. Per day that is $5,071 on a weekday and $5,012 on a weekend day, only about 1% lower.
- **Monday to Wednesday look strongest, but only because of the calendar.** May 2023 had five Mondays, Tuesdays and Wednesdays and only four of each other day. Per day, every day of the week earns between $4,826 and $5,199. Saturday is the best day on average ($5,199) and Sunday the weakest ($4,826).
- **The month has a rhythm.** Average daily sales were $5,056. The first week (1 to 7 May) was below average every day, 17 to 27 May was above average every day, and the last four days (28 to 31 May) fell below average again. The best day was 19 May ($5,658) and the weakest was 29 May ($3,960). In total, 17 of 31 days beat the average.

4. What customers buy (May 2023)

- **Coffee and tea are two thirds of revenue.** Coffee made $60,363 (38.5%) and Tea $44,540 (28.4%), together 66.9%. Bakery (11.8%) and Drinking Chocolate (10.4%) come next.
- **A few products carry the menu.** The top 10 of 29 product types bring 79.2% of sales. The top three are Barista Espresso ($20.4K), Brewed Chai tea ($17.4K) and Hot chocolate ($16.3K), together 34.6%.
- **Four categories barely register.** Branded, Loose Tea, Flavours and Packaged Chocolate add up to only 5.2% of sales. Packaged Chocolate also grew the slowest from April to May (12.4%), while every other category grew between 21.4% and 34.3%.
- **The three stores are almost equal.** Hell’s Kitchen sold $52,599 (33.6%), Astoria $52,429 (33.5%) and Lower Manhattan $51,700 (33.0%). The gap between first and last is only 1.7%.

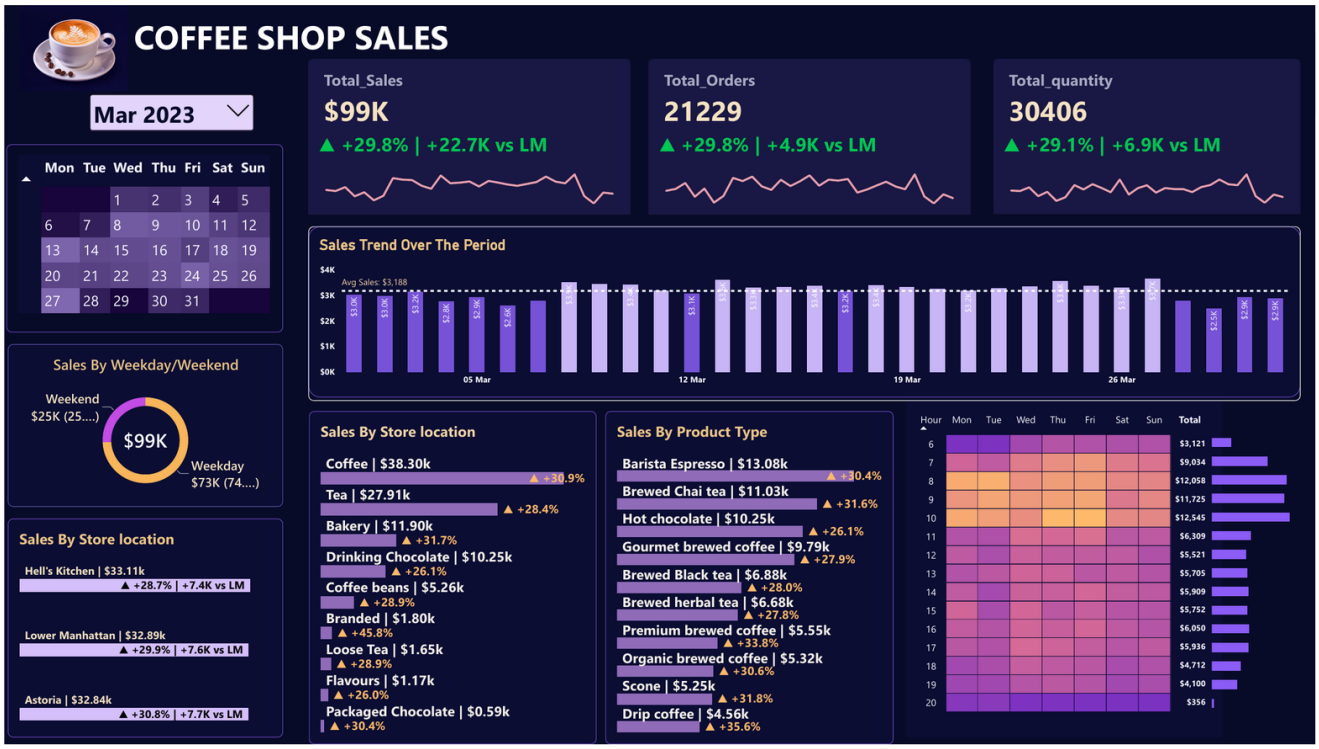

5. Recommendations

- **Staff for the morning rush.** Put the most staff on from 7 to 11 am, when almost half of daily sales happen, and run a lighter team from 11 am to 5 pm.

- **Lift the afternoon.** Try a coffee-and-bakery combo or an afternoon discount, since afternoon hours earn about half of a morning hour.
- **Keep weekend staffing at weekday level.** Sales per day are almost the same, so cutting weekend staff would risk lost sales.
- **Sell more bakery with drinks.** Bakery is 11.8% of sales while Coffee and Tea are 66.9%, so pairing bakery with drinks is the easiest add-on.
- **Review the weak spots.** Check whether the 8 pm hour is worth staffing and whether the four low-selling categories earn their shelf space.

These are suggestions drawn from the data; they have not been tested.

6. Power BI dashboard

Dashboard view with March 2023 selected: sales $99K (+29.8%), 21,229 orders (+29.8%) and 30,406 units (+29.1%) vs February. Use the month slicer in the .pbix file to see any other month.

Notes

- Data covers 1 January to 30 June 2023 for three stores only, so the findings describe this period and these stores.
- The SQL queries in MY_SQL_Queries.pdf use May 2023, so the May figures above match those query results.
